Stake Choir Prep • Oct 24–25

Welcome to KanTime! Follow this 5-step guide to personalize your rehearsal routine, practice parts with dynamic audio/sheet resources, and track verified minutes for your choir section.

STEP 1 Set Up Profile & Avatar

Select your choir voice section (**Soprano, Alto, Tenor, Bass, or Primary**), enter your full name, and pick an illustrated choir portrait to represent you on the community leaderboards.

STEP 2 Configure Preferences

Adjust your rehearsal timer block anywhere from **5 to 60 minutes** (15-minute default) and personalize your target Stake Conference or performance date in Practice Preferences.

STEP 3 Practice & Background Timer

Choose your rehearsal anthem and tap **Start Session**. Click " **Interactive Sheet & Audio**" or " **Watch Video**"—the countdown timer continues accurately in the background while you sing along!

STEP 4 Inactivity Auto-Pause

KanTime features automatic idle detection. If no interaction (mouse, touch, or keys) occurs for **5 minutes** during an active session, the timer pauses with an "**Are you still practicing?**" modal to keep recorded time honest.

STEP 5 Leaderboards & Standings

When the countdown reaches 00:00, your rehearsal minutes are submitted automatically to the Stake Choir Sheet, instantly updating the **Top 10 Dedicated Singers** and the **Section Standings**.
